

eWRIMS Accompanying GIS Documentation

water_sources_xy.shp

This shapefile displays the water sources associated with the applications for which the information was available. This can be used to merge eWRIMS data to the other GIS data described in this document.

Columns:

'ApplID', 'long', 'lat'

CA_hydro.shp

Clipped from the National Hydrology Dataset (<https://nhd.usgs.gov/>), this shapefile displays all of the bodies of flowing water in California. The types of bodies of water represented are: Apparent Limit, Aqueduct, Canal, Closure Line, Dam, Left Bank, Right Bank, Shoreline, Shoreline Intermittent, Stream, Stream Intermittent.

Columns:

'FNODE_', 'TNODE_', 'LPOLY_', 'RPOLY_', 'LENGTH', 'HYDROGM020', 'FEATURE', 'F_CORE', 'NAME', 'STATE', 'STATE_FIPS', 'NAME_UC'

CA_bodies.shp

Clipped from the National Hydrology Dataset (<https://nhd.usgs.gov/>), this shapefile displays all of the masses of water in California. The types of bodies of water represented are:

Bay or Estuary or Ocean, Lake, Lake Dry, Lake Intermittent, Reservoir, Reservoir Intermittent, Stream, Swamp or Marsh.

Columns:

'AREA', 'PERIMETER', 'HYDROGM020', 'FEATURE', 'F_CODE', 'NAME', 'STATE', 'STATE_FIPS', 'NAME_UC'
